ON INTERNAL MECHANISM

Discover the secrets of personal comfort

1. The perforated foam, moulded directly over the frame, gives you a better seating comfort as the indentations let you sink deeper into the seat and back of the recliner. Comfort Zones™ (pat. pend.) provide you with a proper contour for your body; they give good ventilation and guarantee that the cushions will be long-lasting and forever comfortable.
2. A soft polyurethane foam pad ensures optimum softness.
3. The pad of soft polyurethane foam is covered by a layer of super-soft polyester fibre, for a real touch of luxury.
4. Flexo springs on a steel frame ensure durable construction and strength.
5. The Plus™ system automatically provides correct support for your head and lower back. The function is doublesided for maximum stability, functionality and lifetime use.
6. Only genuine top-grain leather covers the front and back of Stressless® chairs.
7. The Stressless® glide system automatically adjusts to your body weight, with no buttons or levers to pull.
8. The two-stem base offers far smoother turning and stability than the one-stem swivels fitted on most recliners.
9. The concealed swivel ring means that you can easily turn full circle. And the gracefully curved shape of the base is designed for great strength and durability.

The Plus™-system makes sure you always have the right support for your neck and lower back

Infinitely variable glide function adapted to suit the body's weight causes the chair to react to your slightest movement

Correct neck rest with built-in reclining position ensures that your neck relaxes while you are reading, watching TV and resting.

Automatically correct support in all positions, the back of the chair arches into your lower back the more you lean back.
